

# MD ZAMAN

Las Cruces, New Mexico, USA

 [linkedin.com/in/shafiq-zaman/](https://www.linkedin.com/in/shafiq-zaman/)

## EDUCATION

---

- **New Mexico State University (NMSU)** Las Cruces, NM  
*Ph.D. Student, Computer Science, CGPA: 3.45* Jan 2025 - present  
*Research Interests: Artificial Intelligence (Planning, Reasoning, Multi-Agent Systems), Action, Planning, Re-Planning, Agentic System Planning, Multi-Agent Path Finding(MAPF)*
- **New Mexico State University (NMSU)** Las Cruces, NM  
*MS in Computer Science* Aug 2022 - Dec 2024  
*Major: Computer Science, CGPA: 3.43/4.00*
- **Ahsanullah University of Science and Technology (AUST)** Dhaka, Bangladesh  
*BSc. in Computer Science and Engineering (CSE)* July 2003 - May 2007  
*Major: Software Engineering, CGPA: 3.24/4.00*

## EXPERIENCE

---

- **High Performance Computing(HPC), New Mexico State University** Las Cruces, NM  
*Graduate Assistant* Aug 2022 - Dec 2022  
I was tasked with developing a Docker image for machine learning that uses GPU resources from NMSU's Discovery HPC and works in any Conda environment across all OS, with all dependencies included in the image.
- **Fintech Lab, Arrowhead Center, New Mexico State University** Las Cruces, NM  
*Graduate Assistant* Jan 2023 - present
  - **Software Developer:** Develop AI/ML based financial software products (**Prediction, Forecasting, Classification, Text processing, Automation using CMake**) and in the frontend I used NextJs on the top of NodeJs server for the aspiring entrepreneurs.

## PROJECTS

---

- **Multi-Agent Search:** Wrote an AI implementation of various multi-agent search agents for the Pacman game, which includes Reflex Agent, Minimax Agent, Alpha-Beta Agent, and Monte Carlo Tree Search Agent. **Tech: Python**
- **ML Practical Implementation of a paper: Creating Classification Models from Textual Descriptions of Companies Using Crunchbase dataset.** Analyze the text contained in different columns to find the classification of objects using different ML classifications models. REF:www.example.com **Tech: Python**
- **Thread Analysis:** Using thread mechanism in Java pull real time live data from a stock company. It improved 10% faster in reading performance compared to the previous ones to make quick decisions for the stock brokers.
- **Digital game development:** Built a AI based 5X5 grid bingo game where the agent's mechanics, win, loss controlled by basic AI algorithms. **Tech: Godot/GD Script**
- **LiveMâché - Real-Time Video Streaming with WebRTC:** Implemented a video streaming feature as a part of HCI tool for LiveMâché research work. **Master's Project**

## SKILLS SUMMARY

---

- **Languages:** C/C++, Python, Java
- **Platforms:** Linux, Windows
- **Frameworks:** Scikit, TensorFlow, Numpy, Pandas,
